

ISO 41001:2018 - Certified Lead Auditor

Module Information

www.gaqm.org

Certification Overview

ISO 41001 Facility Management (FM) integrates multiple disciplines in order to have an influence on the efficiency and productivity of economies of societies, communities and organisations, as well as the manner in which individuals interact with the built environment. FM affects the health, well-being and quality of life of much of the world's societies and population through the services it manages and delivers.

Facility Management course helps in developing necessary skills to conduct internal audits and evaluate the effectiveness of the management system with respect to the requirements of the International standard. It develops skills for planning internal audit, preparing audit activities, conducting audit and preparing a formal audit report for the top management.
