ISO 26000 - Certified Lead Auditor

ISO 26000 is designed to assist organizations in contributing to sustainable development. It is intended to encourage them to go beyond legal compliance, recognizing that compliance with law is a fundamental duty of any organization and an essential part of their social responsibility. The main goal of ISO 26000 is to promote common understanding in the field of social responsibility, and to complement other instruments and initiatives for social responsibility, not to replace them.

ISO 26000 Lead Auditor certification enables you to gain comprehensive knowledge of the key principles and subjects of social responsibility, which are required to audit the integration of a Social Responsibility Program (SRP) within an organization. The Lead Auditor training will equip you with the necessary expertise to measure an organization's performance in terms of sustainable development, legal compliance and society's welfare based on ISO 26000.
