GAQM®

Global Association for Quality Management

Certified Data Protection and Privacy Manager (CDPPM)

Course Outline

About CUED Certification

The Certified Data Protection and Privacy Manager (CDPPM)® designation is the first industry certification which addresses data protection risks with a global and comprehensive approach.

Certified Data Protection and Privacy Manager (CDPPM)® is a comprehensive certification program which leverages international security standards and privacy laws to teach candidates on how to protect personal and business data based on risks residing inside or outside of the information systems.

Also, many of the global data security standards and privacy laws overlap to some extent which are addressed cohesively in the comprehensive CDPPM® data protection training program to educate candidates on how to address risks and compliance requirements efficiently. We believe that once CDPPM® candidates understand the data protection risks as well as the risk management processes, they can then leverage the industry best practices and standards to design their data protection strategies and incident management plans based on identified risks which also meet the regulatory requirements.

Successful completion of the CDPPM® Certification demonstrates to employers and others that the candidate possesses a solid knowledge of data protection law, as well as an understanding of the practical implications for organisations of the current legal requirements and the requirements of the upcoming General Data Protection Regulation.

What Modules are covered?

Module Information - 1

Module 1 – Data Protection - Foundation

Module 2 – Data Protection and Privacy Management System

Module 3 - Data Protection in the Workplace

Module 4 - International Data Transfers - Overcoming the Limitations

Module 5 - Data Management

Module 6 - Business Continuity

Module 7 - Privacy & Compliance

Module Information - 2

Module 8 - Access Controls

Module 9 – System Security

Module 10 - Incident Management

Module 11 – Data Protection and Privacy Strategies

Module 12 - Data Protection and Privacy Plans

Module 13 - Data and IT Security Plans

Module 14 - Data Protection and Privacy Policies

Module Information - 3

Module 15 - IT Security Policies

Module 16 - Corporate Management Policies

Module 17 - Data Protection Responsibilities

Module 18 - Data Protection Registers

Module 19 - Data Protection and Privacy Controls

Module 20 - Data Security Controls
