ISO 37101 – Certified Lead Implementer — Certification Overview

The ISO 37101 Certified Lead Implementer certification is designed to develop the competence required to plan, implement, manage, and continually improve a Sustainable Development Management System (SDMS) in accordance with ISO 37101. This certification equips professionals with practical knowledge of sustainability principles, governance, stakeholder engagement, and performance evaluation to support resilient, inclusive, and sustainable communities.

Participants gain a thorough understanding of ISO 37101 requirements, including leadership roles, policy development, risk-based thinking, sustainability objectives, and monitoring mechanisms. The program emphasizes real-world application, enabling certified professionals to translate sustainability strategies into measurable actions aligned with social, environmental, and economic goals.

By earning the ISO 37101 Certified Lead Implementer credential, professionals demonstrate their ability to lead sustainability initiatives, ensure compliance with international standards, and drive continuous improvement within organizations, cities, municipalities, or communities. The certification enhances professional credibility and supports organizations in achieving long-term sustainable development outcomes.

Target Audience

- Sustainability managers and officers
- Urban planners and smart city professionals
- Government officials and municipal administrators
- Environmental, social, and governance (ESG) professionals
- Policy makers and development planners
- Consultants and advisors in sustainable development
- Infrastructure, utilities, and public service managers
- Professionals responsible for community development and resilience initiatives

What Modules are covered?

Module 1 - Introduction to ISO 37101 and Sustainable Development

- Overview of sustainable development concepts
- Purpose, scope, and structure of ISO 37101
- Principles of sustainable, resilient, and inclusive communities
- Relationship with UN SDGs and other ISO management system standards
- Benefits of implementing ISO 37101
