ISO 26000 - Certified Lead Auditor

ISO 28000 focuses on aspects critical to manage and assure security risks. This may include financing, manufacturing, information management and transportation, in-transit storage and warehousing of goods. Originally devised to cover only the supply chain, the revised 2022 version can be used throughout all aspects of security of the organization.

This Certification provides a complete knowledge of ISO 28000:2022 standard and the requirements for security management systems. This training will also equip you with the knowledge and skills of auditing process, audit techniques, nonconformity reporting as well as your roles and responsibilities as a lead auditor for ISO 28000 security management system audits.

What Modules are covered?

- 1) Explain the fundamental concepts and principles of a security management system based on ISO 28000
- 2) Interpret the ISO requirements of 28000 for a SeMS from the perspective of an auditor
- 3) Evaluate the SeMS conformity to ISO 28000 requirements by applying and utilizing widely recognized audit concepts and principles
- 4) Plan, conduct, and close an ISO 28000 conformity assessment audit, in accordance with the requirements of ISO/IEC 17021-1, the guidelines of ISO 19011, and other best practices of auditing
- 5) Manage an ISO 28000 audit program
