### ISO 14001:2026 – Certified Lead Implementer - Certification Overview

The ISO 14001:2026 - Certified Lead Implementer Certification is designed to provide professionals with the knowledge and practical skills required to establish, implement, manage, and continually improve an Environmental Management System (EMS) in accordance with the ISO 14001 standard. This certification focuses on helping organizations identify, manage, monitor, and control their environmental impacts while ensuring compliance with applicable legal and regulatory requirements. Participants gain a thorough understanding of environmental management principles and best practices that support sustainability and responsible business operations.

The certification emphasizes a practical, risk-based approach to environmental management, covering key elements such as organizational context, leadership commitment, environmental aspects and impacts, compliance obligations, operational controls, and performance evaluation. Certified Lead Implementers are trained to lead EMS implementation projects, develop environmental policies and objectives, conduct risk assessments, manage documentation, and drive continual improvement initiatives. The program also highlights integration with other ISO management system standards such as ISO 9001 and ISO 45001, enabling a streamlined and efficient management system approach.

### Target Audience

The target audience for the ISO 14001:2026 - Certified Lead Implementer certification includes environmental managers, sustainability professionals, compliance officers, quality and HSE managers, consultants, and individuals responsible for environmental performance within an organization. It is also suitable for professionals involved in policy development, regulatory compliance, risk management, and operational leadership roles. This certification is ideal for those seeking to enhance environmental performance, support sustainable development goals, and demonstrate expertise in internationally recognized environmental management standards.

### What Modules are covered?

#### Module 1 - Introduction to ISO 14001:2026 and Environmental Management Systems

- Overview of ISO 14001:2026 standard
- Principles of Environmental Management
- Benefits of implementing an EMS
- PDCA (Plan-Do-Check-Act) cycle
- Relationship with other ISO management system standards

#### Module 2 - Context of the Organization and Leadership

- Understanding organizational context (internal & external issues)
- Needs and expectations of interested parties
- Defining EMS scope
- Leadership roles and responsibilities
- Environmental policy development and commitment

#### Module 3 - Planning – Environmental Aspects, Risks, and Compliance

- Identification of environmental aspects and impacts
- Risk and opportunity assessment
- Legal and regulatory compliance obligations
- Environmental objectives and planning actions
- Emergency preparedness and response

#### Module 4 - Support and Operational Control

- Resource management and competence requirements
- Awareness and communication processes
- Documented information and control
- Operational planning and control
- Supplier and contractor environmental management

#### Module 5 - Performance Evaluation and Monitoring

- Monitoring and measurement of environmental performance
- Compliance evaluation techniques
- Internal EMS audits
- Management review process
- Use of KPIs and performance metrics

#### Module 6 - Continual Improvement and EMS Implementation Project

- Nonconformities and corrective actions
- Continual improvement methodologies
- EMS implementation roadmap
- Integration with ISO 9001 and ISO 45001
- Certification preparation and implementation best practices
