

## ISO 41001:2018 Certified Lead Implementer

[www.gaqm.org](http://www.gaqm.org)

### ISO 41001:2018 Certified Lead Implementer - Certification Overview

The ISO 41001:2018 Certified Lead Implementer certification validates a professional's ability to plan, implement, manage, and continually improve a Facility Management System (FMS) in accordance with the ISO 41001:2018 standard. It demonstrates in-depth knowledge of facility management principles, including strategic planning, operational control, risk management, performance evaluation, and alignment of facilities with organizational objectives. Certified Lead Implementers are equipped to translate business needs into effective facility management policies and processes that enhance efficiency, sustainability, and value delivery.

This certification also confirms the capability to lead implementation projects, conduct gap analyses, define system documentation, and support organizations through internal audits and management reviews. Holders of the ISO 41001:2018 Certified Lead Implementer credential play a key role in ensuring compliance, improving service quality, optimizing resources, and supporting continual improvement within facility management operations. The certification is internationally recognized and is suitable for facility managers, consultants, auditors, and professionals responsible for implementing or maintaining an FMS..

### Target Audience

The ISO 41001:2018 Certified Lead Implementer certification is designed for facility managers, facility management professionals, and consultants who are responsible for planning, implementing, maintaining, or improving a Facility Management System (FMS). It is ideal for individuals involved in strategic facility planning, service delivery, asset management, risk management, and compliance with international standards.

This certification is also suitable for project managers, operations and quality professionals, internal and external auditors, and senior managers who oversee facility management functions. It benefits organizations seeking to improve operational efficiency, sustainability, and alignment of facility services with overall business objectives through a structured, standards-based approach.

### What Modules are covered?

#### Module 1 - Introduction to ISO 41001 and Facility Management

- Overview of Facility Management concepts
- Purpose, scope, and benefits of ISO 41001:2018
