

**Exam Name – Certified Software Automation Tester Advanced Level
(CSATAL)**

Exam Code – CSATAL-001

Sample Exam

(Question): A major issue with capture/playback tools is:

- (A): They are not easy to use
- (B): They are not tool useful in management
- (C): It is necessary to edit the recorded scripts
- (D): It is not necessary to edit the recorded scripts

(Correct): C

(Question): The benefits of data-driven test automation are that: (Choose three)

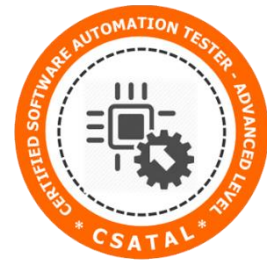

- (A): test data is easy to define and create
- (B): new tests can be added by adding new test data
- (C): the test is described in one or a few scripts, which makes maintenance easier
- (D): unattended testing can be performed with many instances of test data

(Correct): B,C,D

(Question): To create modular test scripts, you must first:

- (A): design tests
- (B): create test data
- (C): decompose the application based on functions
- (D): create a driver script

(Correct): C

(Question): Structural test tools can perform which of the following functions?

(Choose three)

- (A): Allow design of tests based on code structure
- (B): Create functional tests
- (C): Verify software functions based on expected behavior
- (D): Repeat tests

(Correct): A,C,D

(Question): After starting a tool acquisition effort, if you learn your organization is not ready, you should

- (A): just give up
- (B): hire consultants to do the job for you
- (C): stop and build the capabilities before resuming
- (D): keep going since the tools will do all the work

(Correct): C

(Question): CTE-XL is a free tool used for test design based on which approach?

- (A): Classification Trees
- (B): Cause/Effect graphing
- (C): Requirements-based testing
- (D): Random sampling

(Correct): A
